DETAILED ACTION

Priority

Specification

1. The attempt to incorporate subject matter into this application by reference to the related application is improper because it incorrectly lists a provisional related application of 09/240,242 instead of a non-provisional application of 09/242,212.

Correction is required.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 8, 10,15, 18, 22-23, 29 and 31-34 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Rhoads, US Pub 2003/0128861 A1, hereinafter "861.
3. As per claims 1, 8, 10,15, 18, 22-23, 29 and 31-34, '861 teaches the claimed invention having: a method/apparatus and computer program product for restoring a geometrically distorted copy of a reference image, automatically determining the type and amount of distortion, reversing the distortion, forming a reoriented image, horizontally and vertically aligning the image and extracting the watermark. See Abstract, figs. 1-2, 4-8, col. 4, lines 6 et seq., col. 5, par. 83, pages 6-9 et seq., claims 1, 9 and 15-23..

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1, 8, 10, 15, 18, 22-23, 29 and 31-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, 9-11, 16-18, and 21-24 of U.S. Patent No. 6,571,021B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because due to the open-end language used in the patent it provides protected patented coverage to the other embodiments disclosed in the patent.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
